WHAT SETS US APART?

1. **DE-RISKING OF CHALLENGES RELATED TO LAND AND ROW**
2. **REDUCE PROJECT IMPLEMENTATION RISK THROUGH PLUG-N-PLAY DESIGN**
3. **WE HELP IN MITIGATING POWER EVACUATION RISKS THROUGH TIMELY PERMITS AND APPROVALS**
4. **WE CUSTOMIZE THE SOLUTION**
5. **WE DO NOT WORK ON “ADVANCES” AND THUS DEMONSTRATE “SKIN IN THE GAME” CONCEPT IN ACTION**
6. **OPTIMAL RESOURCES FOR THE PROJECT**

WHY SOLAR?

WHY SOLAR FOR YOUR BUSINESS?

It's understandable to ask, “**Why to use solar power for my business?**” we're here to answer that question with our experience and expertise in the field. With commercial solar energy, your company receives alternative energy that:

- **Reduces energy bills for your business.** You can't run your business without power. Solar energy **lowers your energy bills**. How much you save depends on your system's size and energy use, but the average commercial property sees a **75 percent reduction** in their bill.
- **Improves cash flow and profit.** Thanks to Solar Renewable Energy Credits (SRECs), you can profit from your commercial solar installation. Get paid by utility companies, who are required to purchase SRECs, and add to your cash flow and profits.
- **Offers tax deductions.** Accelerated depreciation and additional depreciation is available which helps reduce the tax liability while resulting in savings at the same time

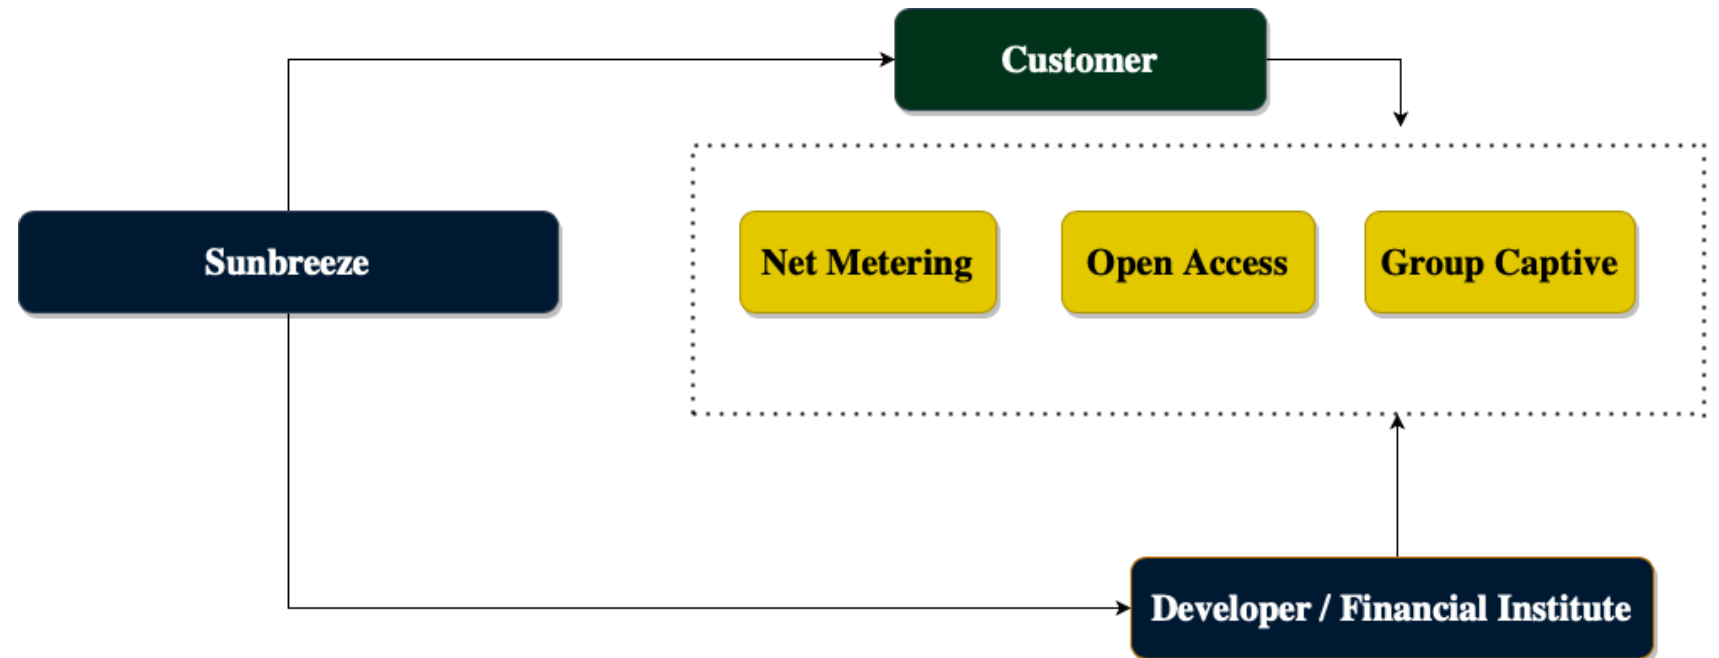

WHY SOLAR FOR YOUR BUSINESS?

- **Winning more customers.** A **go-green initiative** may not be your main motivation for switching to commercial solar energy, but consumers are attracted to businesses with a sustainability commitment.
- **Improving employee satisfaction.** Employees respond favourably to sustainable efforts and many prefer to work for sustainability-minded businesses.
- **Provides payback in less than 10 years.** Our commercial solar installations have an average payback period of five to six years.
- **Adds real estate value.** Even if you're not planning on selling your facility, an increased property value is helpful if you're taking out a mortgage to expand or improve your company's services.
- **Includes system monitoring:** We check your commercial solar system and you can too. If any issues come up, our knowledgeable **team is notified and ready to assist.**

The advantages of solar power for businesses can make them a smart decision. By installing solar, your business will be able to lock in electricity prices and reduce reliance on an unpredictable expense. Going solar makes it easier for companies to budget and plan for the future.

CAPTIVE POWER

Convert your rooftop, parking lot or surplus land into a source of clean energy

- Sunbreeze develops Renewable Energy projects that complement your business growth and support you with your net-zero goals.

How does it work?

- We work together with your team, study your energy needs and provide a solution that ensures increased savings and maximum clean energy from your facility.
- We consider all the available area in your premises to maximise the plant output.

OFF SITE POWER

Net-Zero Transition

- Source up to 70% of your electricity need from our Off-Site Renewable Projects.
- Our experts work together with your team, helping you meet all compliances.

Accelerate Savings

- Get Renewable energy at up to 50% lower rate than from the grid.
- You only pay for the amount of electricity consumed, unlocking savings from Day 1.

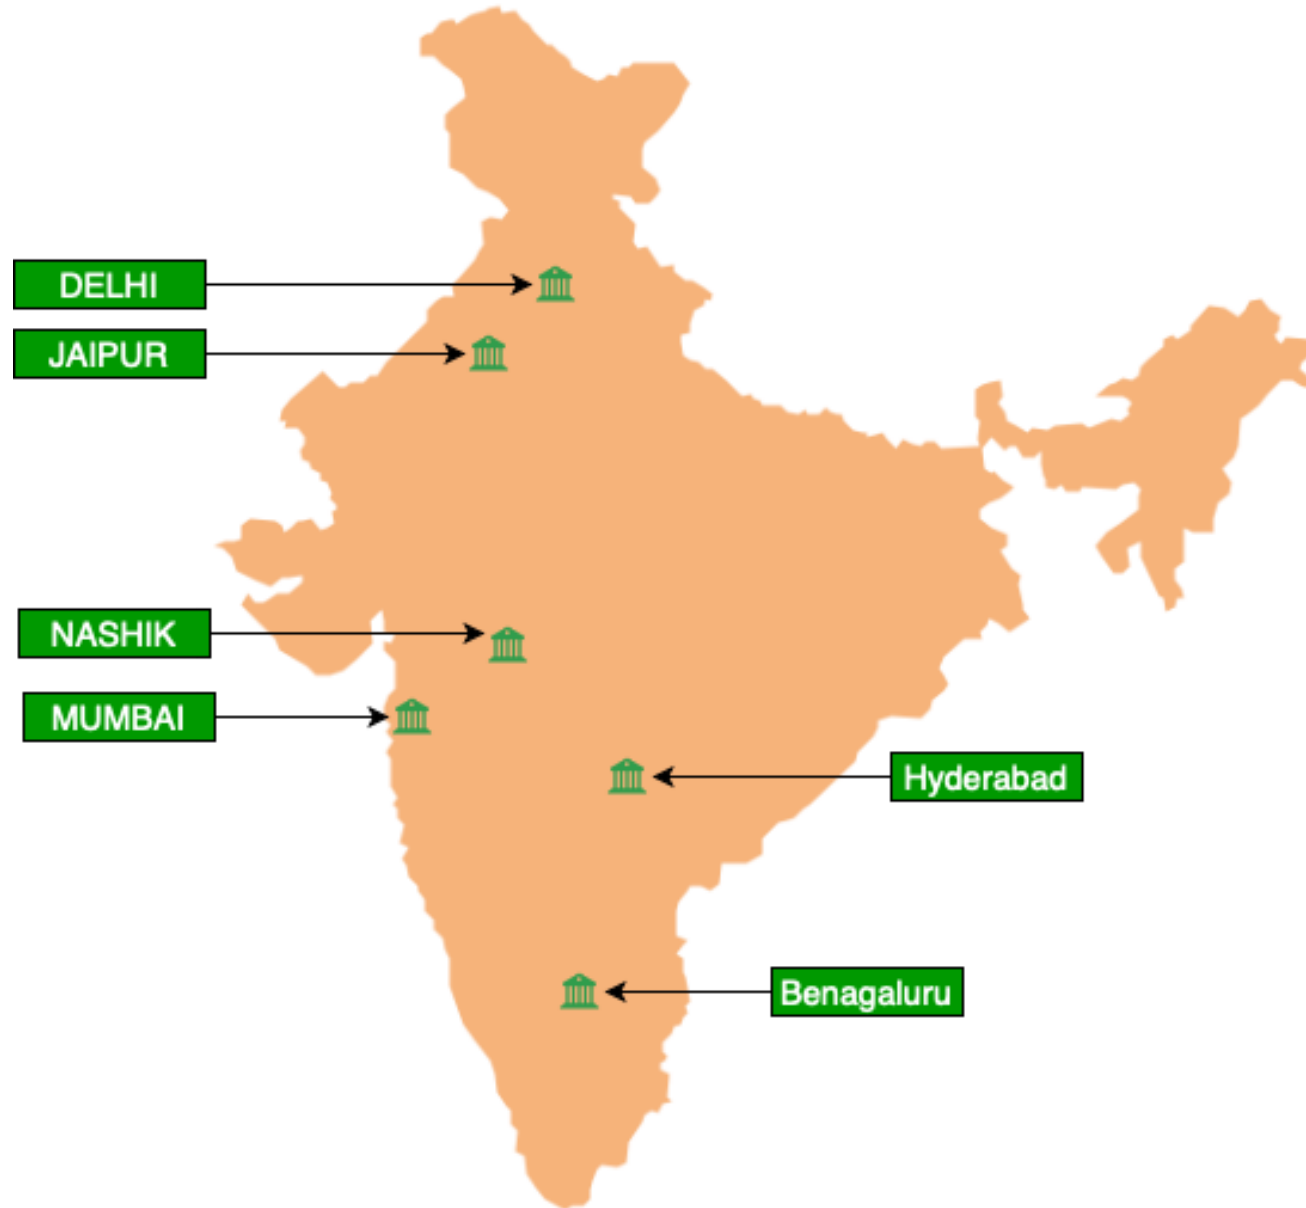

Complete Service

- Our team takes care of the entire development cycle, and manages the asset for its entire technical lifetime, making your energy transition hassle-free.
- You can track the performance of your plant, in real-time, using the state of the art data monitoring solutions.
